30 cm. Yellow wire #20, 22 cm. 5 of splittable chopstick. Packing, kapok small amount each. Glue.

**Finished Size** 42 cm tall

### Cutting

Cut head, nose, and dress with 1 cm seam allowance, the rest with no allowance.

# Some Hints for Stuffed Toys

## Materials

Try to find materials of your own in your daily life. All those old clothes in your wardrobe, ribbon tape or vinyl string used for packages, left-over pieces of yarn or fabric, etc., can all be used to create delightful toys.

## Cutting

Transfer pattern on tracing paper, cut out the traced pattern. Place the pattern on fabric, with its arrow mark parallel to the grain of fabric, trace outline using tailor's chalk.

Cut fabric along the inside of chalk line. Be careful not to cut the pieces for left and right in the same direction.

## Sewing

With seam allowance...Machine stitch wrong sides together. In the case of hand sewing, work fine back stitches using heavier weight of sewing cotton.

Without seam allowance (felt for instance)...Putting pieces right sides out, work around in open-buttonhole stitch or whip stitch, using machine thread or 6-strand embroidery floss in matching color.

**Open-buttonhole stitch**

**Whip stitch**

**Right-angled slip stitch**

**Securing fabric piece with open-buttonhole stitch**

## Turning inside (right side) out

Trim allowance to 0.5cm-0.8cm, clip at intervals, turn the piece to right side.

## Stuffing Materials

Kapok..The most suitable material for these stuffed crafts, both for the comfortable way it feels and the natural way it springs back into shape. Stuff it in firmly from the beginning, or the work will get thinner in use.

Tetoron batting...Springy, washable, and not stiff like cotton batting, it is a very convenient stuffing, and one of the most popular ones.

Packing...A kind of wooden chip, it might be called "wood wool." It is convenient to use for sections like the head and body, where a solid finish is required.

## Stuffing Methods

Do not stuff any piece of material rounded by hand. Fray material softly and build up an area little by little. If a narrower section is to be stuffed, use a screwdriver, chopstick, or some similar kind of stick. As for the neck, stuff plenty of padding into it tightly, or insert a piece of thick wire or stick in the middle, so that the head above becomes stable.

Having finished stuffing the work, tap the whole work with your palm to make the padding inside smooth. Finish the work by ironing with a damp pressing cloth.

Packing should be stuffed in firmly with the help of a screwdriver.

## Setting Hands and Legs in Position

Secure with fine stitches scooping the sections inward.

Wind thread around the same way as sewing on buttons. This shanklets hands and legs move freely.

## Stitches Used in the Work

Outline stitch

Chain stitch

Cross stitch

Straight stitch

Double cross stitch

Bullion stitch

Fly stitch

French knot stitch

Bullion knot stitch

Couching stitch

Satin stitch
